## CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

## 1 - 14 (canceled)

15 (new): A phase-change optical information recording medium in which information can be recorded, erased and read, comprising:

a substrate; and

a recording layer located overlying the substrate and achieving a crystal phase and an amorphous phase,

wherein the recording layer satisfies the following relationship:

## Ac < Aa

wherein Ac represents an absorptance of the recording layer in the crystal phase against light having a wavelength of from 370 nm to 450 nm and Aa represents an absorptance of the recording layer in the amorphous phase against the light having a wavelength of from 370 nm to 450 nm; and

wherein information is recorded in the recording layer with light having a wavelength of from 370 nm to 450 nm at a recording density of 0.05  $\mu$ m/bit to 0.16  $\mu$ m/bit.
